TRUSTED FOR OVER 75 YEARS

Everest is one of India's fastest growing building solutions companies. Since 1934, people have trusted Everest with their most valuable assets, their factories, warehouses and homes. We have covered more than 1 billion sq. m. of industrial and residential roofs.

Our range of ready-to-use products provides solutions for your building needs in roofing, ceilings, walls, floors, cladding and doors. We manufacture Pre-Engineered Buildings and Smart Steel Buildings for the industrial and commercial sectors.

Everest Building Solutions. For **Strength, Speed and Safety.**

EVEREST FIBRE CEMENT BOARDS

Everest has vast experience in producing over 1 billion sq. m. of roofing and over 48 million sq. m. of fibre cement boards. The current capacity for producing non-asbestos fibre cement roofing and boards is 14 million sq. m. and 16 million sq.m. per annum respectively. Everest Fibre Cement Boards are manufactured using state-of-the-art Hatschek manufacturing process, using basic mix of cement, cellulose pulp fibres and additives. The final curing is done through autoclaving that involves High Pressure Steam Curing (HPSC). No asbestos is used during the entire process, making Everest products 100% asbestos-free and environment-friendly. All products conform to the highest International Standards and are manufactured using the latest European Technology.

These contemporary green building materials are suitable for all modern and conventional constructions, and contribute in earning significant LEED points. The simplicity and embedded beauty with added resistance against moisture, fire and termite makes them a perfect material for applications ranging from roof sarking to flooring.
